

Cloud Governance Audit

Do you have services running in Azure platform? The user access is all over the place? All services are named inconsistently, not sure about the security status, tags are not consistent and billing is an issue?

A two-day project where Zure audits and inspects your existing Azure environment and Azure governance model to find and document the gaps between the current state and Microsoft Cloud Adoption Framework (CAF) disciplines.

Zure Cloud Governance Audit is focused on enterprises who already have products and services running on Azure but are running into issues after the usage has been grown organically.

THE PROJECT

We Audit and Benchmark your cloud governance for missing and crucial information

- Identity Baseline
- Security Baseline
- Deployment Acceleration
- Resource consistency
- Cost management

The project starts with a kick-off meeting and ends with an Benchmark, GAP Analysis and audit documentation handover workshop.

THE PURPOSE

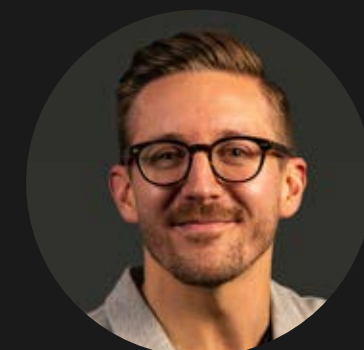

- To audit and Benchmark existing governance model to find out missing pieces and gaps against Microsoft Azure CAF
- To understand what steps to take to steer correct adoption track in your organization
- To understand how to mitigate public cloud risks
